SIGNIFICANT ACCOUNTING POLICIES:

Basis of preparation of financial Statements:

The financial statements are prepared under the historical cost convention, ongoing concern basis and all material respects with the Accounting Standards notified under Section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules 2014. The Company follows the mercantile system of accounting and recognizes income and expenditure on accrual basis to the extent measurable and where there is certainty of ultimate realization of incomes. The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

Accounting policies have been consistently applied except where a newly –issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

As the half year and year-to-date figures are taken from the source and rounded to the nearest digits, the half year figures in these financial statements added up to the figures reported for the previous half year might not always add up to the year-to-date figures reported in these financial statements.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities and commitments at the end of the reporting period and results of operations during the reporting period. Although these estimate are based upon the management's best knowledge of current events and actions. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

All material expenditure and income to the extent considered payable and receivable are accounted for on accrual basis, except for insurance claim and refunds/subsidy from statutory authorities, which are accounted on cash basis, keeping in view the concept of materiality.

Accounting estimates could change from period to period. Accrual results could differ from these estimates. Appropriate changes in estimate are made as the Management becomes aware of changes in circumstances surrounding the estimate. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.
